

## We invite you to attend an **SD Global Connect Workshop**

Dubai, 13 October 2016 Riyadh, 17 October 2016 Jeddah, 19 October 2016

# Discover the latest trends and technology in satellite communications.

Together with industry leaders, we are bringing you most recent developments in business aviation connectivity solutions. Join us and experience new product demos, training, and forum discussions with subject matter experts you won't want to miss it!

#### Topics include:

Event Partners

- The latest trends and best practices in business aviation
- Updates from Inmarsat, including Ka-Band Jet ConneX, and from Universal Weather and Aviation
- The latest SD technologies
  - The SDR<sup>™</sup> and SD WiFi Hub<sup>™</sup>, providing powerful connectivity to any size aircraft
  - SD FlightLogs<sup>™</sup>, the world's first automated flight logs solution
  - SD Pro<sup>sm</sup>, the new standard in flight operations management

Demo SD Pro, the new standard in flight operations management. SD Pro brings together the critical information a flight department needs–flight status of your aircraft, communications information, maintenance data, and more–into a single dynamic interface that is easy to use.

Its advanced data accumulation capabilities create a reliable historical record for the life of an aircraft. It even saves money by accurately capturing cycle information down to the second.

SD Pro provides a simple, fast and secure way to view and manage aircraft information by bringing together all the details a flight department needs, in a single resource.

### See a live demo, and learn how SD Pro can turn your traditional flight department white board into an electronic dashboard!

## Connect, learn, share and win!

#### Everyone will receive a voucher to download our mobile applications!

Download the getORT+<sup>®</sup>, Get Satcom<sup>®</sup> or MATA<sup>™</sup> app for free and get mobile SATCOM support and troubleshooting at your fingertips.

#### Register for a chance to win a Unity Kit!

**Lucky draw!** Workshop attendees will be entered for a chance to win a Unity Kit. Connect to various SATCOM systems for troubleshooting diagnostics and configuration information.

Connect at the happy hour networking event in the hotel lounge following the Workshop!

As an added benefit, request an aircraft SATCOM system check when you register, and we'll send an expert to review the systems on board your aircraft and give you an assessment, regardless of current service provider.

## Register today

To register, contact Darin at <u>dvanus@satcomdirect.com</u> or +971 55.191.2689.
