

FlightPak Lite

Powerful scheduling software for small flight departments.

FlightPak® scheduling software from Universal Weather and Aviation, Inc. helps you stay on top of crucial details – no matter the size of your flight department. FlightPak Lite™ provides a streamlined version of the original software specific to the requirements of smaller flight operations – an easy-to-use interface as intuitive as the original product, including access to the same utilities.

FLIGHTPAK LITE FEATURES INCLUDE:

- Support for one to three aircraft, including a Fleet Profile
- More than 20 preflight reports, including tripsheets, passenger Itineraries, international reports, and more
- A variety of calendar formats for managing/scheduling fleet and crew
- Crew Roster: Store crew contact information and date of birth; scan and store passports, pilot's license, and medical certificates for easy access
- Passenger/Requestor Catalog for managing contact information, preferences, health information, dietary restrictions, and more
- Airport Catalog (maintained by Universal®), with information on 14,000+ airports worldwide, including an FBO/handler database
- Unlimited users (three logins may access the system concurrently)
