

EUROCONTROL ETS Contract Office

SWISS ETS: acquisition of aviation data in 2018

We take this opportunity to bring to your attention that all Aircraft Operators included in the EU ETS list in 2016 and planning to carry out flights within the scope of the Swiss Ordinance in 2018 (flights within Switzerland and flights from Switzerland to the European Economic Area (EEA), are required to submit a tonne-kilometre monitoring plan to the Swiss Federal Office for Environment.

EUROCONTROL will provide by the end of the year a Draft **SWISS TKM report** to all Operators who subscribe to the Draft EU ETS report and who have performed flights within the SWISS scope.

Further information on the Swiss tonne-kilometre exercise in 2018 can be found on the Swiss Federal Office for Environment website (please also consult the Ordinance, the explanatory report, the guidance and the FAQs on this subject) or by sending an email to climate@bafu.admin.ch

More information and access to the EU ETS Support Facility is available through our website

Best regards,

ETS Support Facility Contract Office
(for Aircraft Operators and related Third Parties Users)
