EUROCONTROL ETS Contract Office

Dear Users,

We would like to inform you that you can now subscribe to the ETS Support Facility for Aircraft Operators service in order to receive data and reports related to 2021 traffic to help you comply with the following schemes.

These data and reports are updated regularly, bringing you the latest available information with each delivery.

EU and Swiss ETSs

The service includes the delivery of the relevant (EU or Swiss) ETS Annual Emissions Report (AER) filled in with data relating to the EU ETS and the Swiss ETS up to **April 2021**, and the delivery of detailed information for each flight relevant under these schemes. The data is updated on a monthly basis. You can request automatic notification when the update results in changes to the latest data and report you received.

UK ETS

As from 1 January 2021, the United Kingdom has implemented a UK ETS in place of the EU ETS. Modifications to the EU and Swiss ETS AERs and details of the requirements for reporting to the UK for the UK ETS are expected to be made available by the relevant authorities for the reporting of 2021. **In the meantime, in order to ensure availability of relevant information, the reports delivered will continue to be based on the practice used for the reporting of 2020 traffic.**

ICAO CORSIA

Some CORSIA-relevant data (traffic and related estimated CO2 emissions) are also available to EUROCONTROL. The coverage includes flights available in the Multilateral Route Charges System operated by EUROCONTROL's Central Route Charges Office (CRCO), supplemented by flights which have operated in the airspace of Iceland. CORSIA-relevant data are included in the delivered flight

detail data and reports, specifically in the EU ETS AER for EEA aircraft operators and in an ICAO CORSIA emissions report for other aircraft operators.

More information and access to the EU ETS Support Facility are available via our website.
