Subject: CORSIA: sample emissions monitoring plans

To: CORSIA focal points (airlines) & participants in IATA CORSIA workshops

Dear colleagues,

In order to help operators with the preparation of their emissions monitoring plan, we have put together a few sample emissions monitoring plans for fictional airlines. These samples are solely aimed at illustrating the level of detail and type of information to be included in the emissions monitoring plan. **Please note:**

- **The template and the level of information to be included will ultimately depend on the expectations of individual ICAO Member States.** We would therefore urge all operators to check with their authorities which template they shall use and clarify any doubts they may have on the expectations of their administrating authority. Mirroring the content of the sample EMP is in no way a guarantee that your EMP will be considered as satisfactory by your authority.
- **The procedures which are suitable and appropriate for one operator may not be appropriate for another operator.** Therefore, we would strongly caution against copying the descriptions in any of the sample emissions monitoring plans. Individual operators must make sure that the procedures they describe in their emissions monitoring plans are tailored for their organization and that they will be able to implement them as described.

The sample EMPs can be downloaded from the links below. Please make sure to also consult the introductory document, with comments and general descriptions.

- Download the [overview and introductory document](#) (pdf).
- Download the sample emissions monitoring plans: [Alpha Airlines](#) (pdf), [Charlie Airways](#) (pdf), [Juliet Wings](#) (pdf).

For any questions, please do not hesitate to contact us.

Best regards,

Michel
