Subject: New EUROCONTROL website- update for ETS users

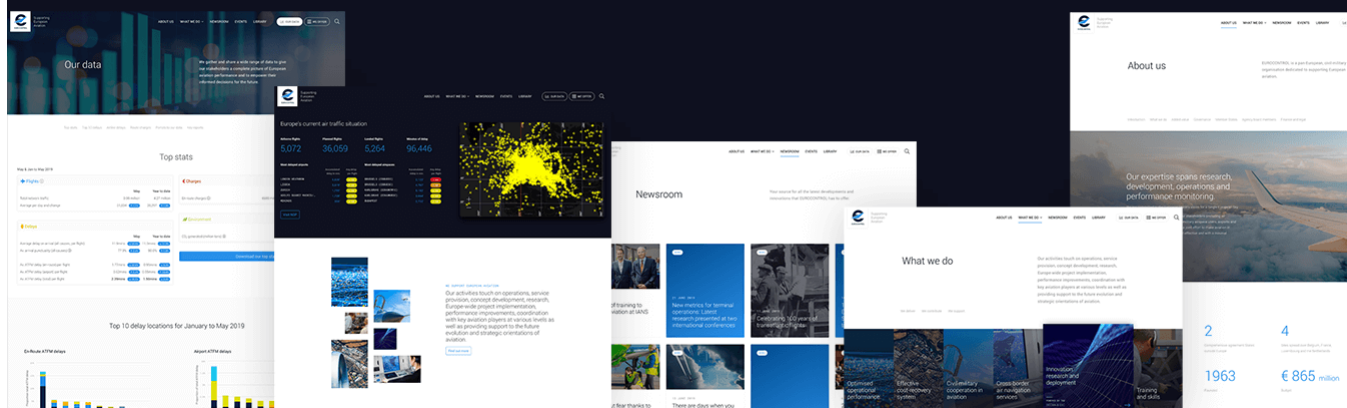

EUROCONTROL ETS Contract Office

Supporting European Aviation

Discover EUROCONTROL's new website

Modern, mobile-friendly, activity-centric

Dear users,

You may have noticed that EUROCONTROL has produced a brand-new public website that is fresh, mobile-friendly and designed to showcase our range of services and products.

As part of that, we have reviewed the **Environment** section of the website and added new content, data and functionalities.

Discover them

There is no change to how you access the Support Facility, which you can find [here](#).

To support your 2019 monitoring process for EU ETS, we would like to remind you that the 2019 Draft Annual Emissions Report (AER) is now available.

The report includes aviation emissions data relating to the Intra-EEA scope of the EU ETS up **to June 2019**. These data are updated on a monthly basis, bringing you the latest available information with each download of the report (late billing or credit for Route Charges, for example).

We are currently working on enhancing our capabilities to support the aviation community in complying with CORSIA – we will get back to you when we have more details.

For additional information about the EU ETS Support Facility, you can visit our new ETS [webpage](#) and let us have your feedback!

Best regards,

**ETS Support Facility Contract Office
(for Aircraft Operators and related Third Parties Users)**
